

Who are we?

We are PlatinumEdge Solutions, and we are a software development company that is excited to be able to add a new programmer to our ranks!

We develop extensions for CET Designer which is a space planning and configuration software. We are an independent partner with Configura, the Swedish software company that owns CET Designer, and manufacturers of products that require a space planning software. We are currently working with several global furniture manufacturers located in both the United States and Canada.

Our company is located in Cutlerville south of downtown Grand Rapids which makes most commutes simple by being only a short distance from either US 131 or M-6.

We have a relaxed work environment. We want our employees to find their most effective way of working productively. You will probably come in and find us whiteboarding a new problem with Thorin, Ember, Zelda or Merlin our office dogs trying to steal attention. We take our work seriously, but we also take not working seriously and enforce a healthy work life balance. Our Gym was completed this year to give us the ability to keep our bodies healthy as well as our minds.

Our core values are Caring, Transparent, Purposeful and Agile. We care about our employees, our clients and ourselves. We are open and clear in our communications internally and externally. We have clear processes for how, what and when we should do things to ensure we consistently provide the best software we can. And we are flexible in our thinking, solutions, and plans to give us room to grow and adapt to new information.

What are we offering?

Write software affecting the day to day of people that you will likely meet.

Interesting, new problems to solve.

An office located in an easy to reach location with walls covered in white boards.

High-powered laptop with an ultrawide monitor for more code real estate.

An onsite gym with showers.

No corporate bureaucracy.

A company that sees programmers as its best asset, not as a liability.

Flexible schedule, generous paid time off, 40-hour maximum work week.

A culture of collaboration.

Premium Coffee.

Make Awesome Software.

Who are you?

You are a versatile, gritty, never say never programmer that loves a good challenge.

You are a hard worker no matter what job you are doing. You believe quality is something you can create through force of will, not something magical that just happens.

You like to roleplay the needs of other people to help you understand their viewpoint.

You have many opinions but have an open mind to enable incoming information to set a new course.

You do your best work as an individual but know when to get input from others to ensure great results.

Expertise, Talents and Feats

Programmer, Software Engineer/Developer, Code Guru, that is well versed in Object Oriented concepts.

Experience developing in Object Oriented languages such as C#, Java, Python and C++.

Bachelors: Computer Science, Computer Engineering, or equivalent experience.

Excited about making software that helps others.

Extra Credit

Emacs experience.

Manufacturing experience.

Customer service experience.

Project Management experience.

CAD or 3D modeling experience.

Are an actual wizard.
